2006-08 KX250F/450F (4-strokes) Kickstand Installation Instructions

To install your new kickstand:

1. Remove the left foot peg and bracket.
2. Install the kickstand under the left foot peg bracket using the stock bolt on the bottom and the new supplied bolt on the top, we recommend using a removable thread-locking agent on the bolts.
3. Make sure that you tighten the foot peg bracket bolts to the correct torque as specified in your owner's manual.
4. Re-install the foot peg.
5. Periodically check the foot peg mounting bolts, and kickstand pivot bolt for tightness.

Maintenance:

Clean and lubricate the kickstand pivot area after each ride. We recommend using a penetrating lube, such as WD-40. If necessary, you can remove the back cover plate for additional cleaning.

CAUTION: We do not recommend starting the bike with the kickstand down, as this may cause damage to the kickstand.
